Testimonials

Some time ago we purchased one of your trailing arm kits, and I finally I got around to using it on my car. I thought I would tell you how happy I was with the kit. I actually have two complete sets of trailing arms, and it took me no time really to get both done.

Your high quality tool made the job an absolute dream!

Michael Solonynko Ottawa Valley Triumph Club

I installed the Miata seat kit in my TR4 today. Very nice, thanks! I am also enjoying my fan eliminator kit.

Next up is the throttle body fuel injection project. I'll need to save up for that one. I wanted to express my appreciation for the kits you put out; they are well designed and good quality.

Ron Anderson
